

## Pool Puzzle

Your **job** is to take code snippets from the pool and place them into the blank lines in the code. You may use the same snippet more than once, and you might not need to use all the snippets. Your **goal** is to make a set of classes that will compile and run together as a program. Don't be fooled – this one's harder than it looks.

```
public class Rowboat _____ {
    public _____ rowTheBoat() {
        System.out.print("stroke natasha");
    }
}

public class _____ {
    private int _____ ;
    _____ void _____ ( _____ ) {
        length = len;
    }
    public int getLength() {
        _____ ;
    }
    public _____ move() {
        System.out.print("_____");
    }
}
```

```
public class TestBoats {
    _____ main(String[] args){
        _____ b1 = new Boat();
        Sailboat b2 = new _____();
        Rowboat _____ = new Rowboat();
        b2.setLength(32);
        b1._____();
        b3._____();
        _____.move();
    }
}

public class _____ Boat {
    public _____() {
        System.out.print("_____");
    }
}
```

**OUTPUT:** drift drift hoist sail
